

## INNOVABILITY (part I) Digital Transition

**AGATHÓN** is an International Open-Access A-Class Journal of Architecture, Art and Design included in the ANVUR list (areas 8 and 10) of Scientific Journals and in many international databases. The International Scientific Committee, for its issues nn. **12 | 2022** and **13 | 2023**, that will be respectively published in December 2022 and June 2023, has proposed the subjects of **Innovability (part I) | Digital Transition** and **Innovability (part II) | Ecological Transition**, aware of their pressing relevance but also of the importance that proposing a double key of interpretation holds.

When, in 1984, the Brundtland Report proposed the need for a new sustainable development for mankind, it was clear that the benchmark was *teknè*, that is, mankind's ability to process elements on the planet that could have become resources, but were still unknown or not usable with the technologies of that time. Environment and technology have always confronted and interacted with each other, today, what we call (natural) environment is already the result of a persistent and profound anthropization of the zoosphere, now a fragile anthroposphere. In our anthroposphere with an unstable balance between research for artificiality and the will to protect the planet, the Covid-19 pandemic made it clear how the sustainable development project is a cryptic objective, we do not know its outline and we cannot work only in conservative terms in it.

The term 'innovability' is used in the field of economic and social sciences. It is considered a renewed driving force for a new development paradigm that expresses one of the most crucial current challenges and the need for a 'supportive' convergence between the two imperative demands of 'innovation' and 'sustainability' as if they were two opposing and conflicting entities. Apart from the term used, especially during a pandemic and its economic and social impact, mankind promotes its prerogative, using 'things' available in nature to make other things with a primary function different from its original one (innovation), aware that those resources are not inexhaustible (sustainability). In this context, always looking to the future, we need to plan our best political and system activities to promote the need to innovate using well and consciously the resources of our planet.

'Green and digital transitions are twin challenges',

stated Ursula von der Leyen, in her inaugural speech as President of the European Commission in 2019. In this sense, the European Green Deal, the Next Generation EU and the New European Bauhaus, together with other national Plans (for example the PNRR in Italy) have a strategic importance both in establishing, clearly and univocally, the paths of future development for an ecological, digital, cohesive and resilient Europe and in correcting the main imbalances of Europe, converging – despite the heterogeneity of the conditions of the Member States – expectations and requests, of a general nature, common and shared, of citizens and businesses. The 'transition' is a common thread that joins subjects and debates concerning science, technology and, at the same, time philosophy, anthropology, ecology and economy. They are described with many technical adjectives that define increasingly limited scopes, yet more open to cross-disciplinary logic, in a sort of speciation of disciplines and language recalling names such as Bateson, Commoner, Catton and Dunlap, Carpo, Kelly, Solis, Negroponte, and Jonas, Morin, Floridi, Caffo.

In this context, where digital anthropology is identified in the term 'anticipation', in the ability to interact with the uninterrupted flux of innovation to build a new digital ecosystem (Solis, 2016), the anthropocentric innovation finds its ideal collocation, expands and evolves, gaining the ability to put humans and their needs at the heart of new important proposals. The priority of this new form of 'sustainable innovation' is the social and environmental wellbeing, joint and contemporary, to facilitate an ethical and sustainable transition for the benefit of the whole community (WEF, 2022). The anthropic transformation of space is an energy-intensive practice that increases the entropy level, still really far from systematic and popular 'cradle to cradle' approaches or from being respectful of non-renewable resources. The subject does not concern disciplinary statutes but cross-disciplinary and cross-sectional aspects aimed at orienting and supporting a resilient, sustainable and inclusive 'recovery'.

The complexity of the subject is one of the challenges of our century. On the one hand, the Global and Sustainability Initiative (GESI, 2021) shows how the 'ecological transition' can ethically direct the opportunities of the digital area, and The European Double Up (Accenture, 2021)

affirms that the ‘digital transition’ is a useful tool to start shared projects whose implementation would otherwise be slower, less pervasive and probably less performing. On the other hand, the union between ‘green’ and ‘blue’ shows many problems and contradictions (Floridi, 2020) up to the point of thinking about the impossibility of implementing the ‘ecological transition’ together with the ‘digital transition’ (Caffo, 2021). Therefore, to make the new ‘innovability’ paradigm – with its double key of interpretation and explanation of the possible scientific research and operational approaches – reach its peak and be implemented, new (material and immaterial) tools should be presented. They should be adequate, new, transversal, interscalar and cross-disciplinary but, at the same time, it appears essential working to build and feed a bond of strategic complementarity between ecology and digital, a two-way osmosis of approaches, progresses, experiments and results within a vision of shared progress and common goals.

A little more than fifty years have passed from the Cybernetic Serendipity exposition (1968), at the Institute of Contemporary Arts of London, the digital element has become increasingly pervasive and ever-evolving, taking the role of ‘powerful enabler’, a network of connected and interconnected human and technological components (Kelly, 2010). The ‘digital transition’, according to a recent research by Deloitte, is showing itself in the improvement of production processes and in an increased use of virtuous behaviours: recycling/composting (68%), reducing energy waste and resource consumption (54%), choosing means of transport with low environmental impact (36%), focusing more on the energy efficiency of houses (36%). These conditions define new development and sustainability settings, while creating a new value, actually accompanying the ecological transition. But much needs to be done in the building industry and industrial design areas.

In the light of these considerations, **AGATHÓN**, turning to disciplinary areas of the Project and in particular of Landscape, Urbanism, Architecture, Engineering, Architectural Technology, Design, Restoration, Recovery, and Representation, presents the topic **Innovability (part I) | Digital Transition** to fuel an open dialogue, by collecting essays and critical reflections, researches and experiments, projects and actions (preferably cross-disciplinary and inter-scalar), innovative and sustainable, which address different issues, including but not limited to:

• **Industry 5.0 (human-centred approach, sustainability and resilience) and digital technology as a**

**driver for entrepreneurship, competitiveness and new professionalism;**

- **digital transition and project language (formal, perceptual and symbolic aspects);**
- **digital for ecological systems (smart ecological systems), energy (smart grids), urban (smart cities), mobility (smart mobility), building (smart buildings), housing (smart homes) and objects (smart objects);**
- **ICT, IoT, cloud, big data, GIS, blockchain, Artificial Intelligence, hybrid intelligence systems, machine learning and sensors for collecting and processing environmental and urban data, for resilience and risk reduction of vulnerable contexts, for designing, enjoying and managing the flexibility of spaces (internal and external), for the optimization and advanced management of the process (design, production, product, service, end of life, reuse/recycling), for non-renewable resources and scraps/waste, for improving accessibility to goods and services (leisure, well-being, health, safety, etc.), for implementing life cycles of sustainable and traceable products, for improving company, product and service performance, for the energy efficiency of the built environment and cybersecurity;**
- **interaction between physical and virtual spaces (virtual reality, augmented reality, ‘geotagging’, ‘location-based’ advertising, etc.);**
- **open-access digital platforms to share and handle data concerning the whole life cycle of the built environment (from the landscape to the small artefact);**
- **industrial digital platforms for modular off-site customised solutions optimised in terms of production, logistics and assembly/disassembly;**
- **morphogenetic, computational, parametric, generative modelling, 6D (sustainability evaluation) and 7D (operations and facility management);**
- **digital twin and virtual mirroring (for projects, systems and product simulations, in different life cycle stages);**
- **digital manufacturing to create sustainable artefacts, products and materials both on large and small scales, also through nano and biotechnologies;**
- .....

**Publication Date**

**December 30, 2022**

redazione@agathon.it

segreteria@agathon.it

Authors are invited to submit an Abstract (max 5,000 characters, spaces included; references are not included in the counting) in Italian, or in English in the case of a foreign contributor, which must mirror the main contents of the article. For the Abstract submission, the Authors will have to use only the downloadable file (Format Abstract ENG) that can be found on the page 'Information for Authors'.

The Abstract must be written concisely and clearly, corresponding to the themes of the Call for Papers. The Abstract must be accompanied by: Author's references (name, surname, qualifications, affiliation, telephone numbers, e-mail); the section of the Journal (Architecture, Art, Design) and the typology of article (Essays & Viewpoint, Research & Experimentation, Review Articles, Dialogue) that is submitted for publication; 5 keywords that reflect the contents of the paper; references that will be mentioned in the article.

In particular, the Research & Experimentation proposals have to outline: originality (what is being expressed for the first time and for what target); essay and research references (the background of the study), relevance to the theme, subjects involved, financing; results (analytical aspects and proposals for discussion); limitations of research and significant developments; cultural, practical and/or socio-economic implications, if any.

In the case of Essays & Viewpoint proposals, attention has to be given to: object and aim of the proposed article; originality (what is being expressed for the first time and for what target); methodological approach; essay and research references that reveal the background of the study; analytical aspects and proposals for discussion.

The Abstract submission is possible until **July 05, 2022**, final deadline, by sending a .doc file to the e-mail [redazione@agathon.it](mailto:redazione@agathon.it). The Authors of accepted Abstracts will receive a communication from the Secretary by July 20, 2022.

Once an Abstract has been accepted, the Authors will be invited to deliver the Paper within the term set, i.e. by **September 13, 2022**. The Paper must respect the number of 25,000 or 30,000 characters, including spaces, notes and references. About 15 images (300 dpi) must also be sent via 'wettransfer.com'. For the Paper submission, the Authors will have to use only the downloadable file (Format Paper ENG) that can be found on the webpage 'Information for Authors'.

The Authors of the accepted Papers, having been reviewed by Referees, will know the outcome by October 13, 2022; the final draft of the Paper, adding any integration following the Referees recommendations, must be presented by **October 26, 2022**.

Paper, with its abstract and keywords, must be entirely written both in Italian and English while notes, captions of images, texts of any tables and Author's biography will be published only in English. The text, bibliographic references, images and notes, must comply with the Editorial Guidelines for Authors listed on the webpage 'Information for Authors'. On the same webpage, Authors can find the review form that will be used by Referees.

**POLICY FULL OPEN ACCESS** | AGATHÓN is a Full Open Access Journal, in the sense that it guarantees that no user, no university library nor individual reader, will have to pay a pay-per-view fee in order to access to the published contents. Therefore, AGATHÓN gains no income nor profit from the sale of printed issues or the on-line version from pay-per-view fees.

In order to cover costs of running the Journal and dealing with procedures for assessing papers using a double blind peer-review, AGATHÓN has decided to avail itself of a contribution from the Authors of the articles; they are therefore invited to contribute financially for the editorial services (APC – Article Processing Charge), only if the paper is accepted for publication, after the peer-review process and any potential revision of the paper. The contribution for authors of a single paper is set at: € 300 for DEMETRA Ce.Ri.Med. members; € 350 for others.

In the case of papers written by more Authors, the article publication fee will be increased by € 50 for each Author in addition to the first two. The fee must be paid in accordance with the guidelines that will be sent to Authors at the same time as the communication of acceptance of the paper for publication. The fee must be paid via bank transfer:

DEMETRA Ce.Ri.Med.  
Banca UNICREDIT, Viale della Libertà D - Palermo  
IBAN: IT 06 T 02008 04638 000104623621  
Swift/BIC: UNCRITM1856

**To encourage the publication of contributions by Authors with primary affiliation to Universities and Research Institutions in countries defined by the World Bank as 'low-income and lower-middle-income economies', AGATHÓN will select a maximum of two Authors to publish their contribution for free, subject to the positive outcome of the double-blind peer review process.**

# EDITORIAL GUIDELINES FOR AUTHORS

## 1. AIMS AND PAPER CATEGORIES

AGATHÓN is a Scientific Journal targeted at an international and interdisciplinary community. It reports essays and viewpoint, reviews, interviews and recent results of research and innovative-current applications, in particular presenting evidence of how research results can be applied. AGATHÓN publishes full articles and papers by Authors working in Universities and research Institutes. The articles selected for publication, after the double-blind peer review process, will be inserted in one of the sections "Architecture" (architectural, urban and interior design, exhibition and museum design, technology, history, recovery and restoration), "Art" (modern and contemporary) or "Design" (for industry, crafts and communication) and will be classified into the following categories: "Essays & Viewpoint", "Research & Experimentation", "Review Articles" or "Dialogue". The essays on "Focus" section are signed by Authors invited by the Scientific Director as experts on the subject and are not subject to the double-blind peer review process.

## 2. PAPER SUBMISSION

Abstract and Papers must be sent by email to the e-mail [redazione@agathon.it](mailto:redazione@agathon.it) together with everything indicated in point 3. Images must be saved as separate files, as stated in point 4. The layout is reviewed by the Editorial Board during editorial meetings; Authors will be sent the relative draft layouts for review.

Papers that do not comply with the editorial rules set out below will not be accepted. All communication (acceptance or rejection of the article, other types of communication) will be made solely to the contact Author, identified by default as the person who sent the article. Articles submitted for a double blind peer review, if accepted for publication, may be sent back to the contact Author for any additions/corrections required. The final decision regarding acceptance, revision or rejection rests with the Scientific Director.

## 3. PAPER FORMAT

**Size of articles** | The size for articles is 25,000 (equal to 8 Journal pages) or 30,000 (equal to 10 Journal pages) characters (including spaces, notes and references) in the Italian or in English language. Abstract and Authors' CV are not included in the count.

**Texts** | The texts, all in Italian and English language, must be delivered in digital format using only .docx format that can be downloaded in the journal's site. Two files will be delivered: one for the Italian text and one for the English text, complete with the name of the author and the title of the paper as follows: M\_Rossi\_title ITA; M\_Rossi\_title ENG. Authors are expressly invited to have their texts in English/Italian language scrutinized and corrected by a native English/Italian speaker. Articles that are written in faulty English/Italian will not be accepted.

**Times New Roman corpo 11 characters** should be used in articles.

The text must include:

- Title and subtitle (max. 90 characters with spaces), uppercase and bold characters, in ITA and ENG.
- Authors: name, surname.
- Category of article.
- Article abstract (max. 900 characters with spaces), italic corpo 9 characters, in ITA and ENG.
- Keywords (5 keywords), in ITA and ENG.
- Body of the article, in ITA and ENG.
- Numbered footnotes at the end of the paper (corpo 9 characters), in ITA and ENG.
- Image captions (corpo 9 characters) supplied with the article; image captions must contain the same letters/numbering used for the corresponding files, name of the photographer(s) or coyright, in ITA and ENG.
- Technical details of any projects listed in the article, or Location, Client, Designers, Chronology, (Manufacturers and Businesses, if of interest), in ITA and ENG.
- References in the original language.
- Author biography (max. 400 characters with spaces for each Author) including affiliation, nationality, telephone number, e-mail, in ITA and ENG.

**Footnotes** | Footnotes are to be placed at the end of the paper, with no automatic link to references in the text itself. Within the narrative references are to be marked with progressive numbers in apex. The word count for the footnotes is included in the maximum of characters for the text.

## 4. FIGURES

**Number of accompanying graphics** | The quantity of graphic additions (photographs, illustrations, graphs, tables) for each article must be decided by the author bearing in mind the size of the text and number of pages normally envisaged for the type of article. The graphic additions should complement understanding of the text; a space for the graphic extras, occupying no more than 40% of the space allotted for the article, is hypothesized; the number of images is estimated as between 10 and 20. It is preferable to send an accompanying image that can be read in both b/w and colour.

**Photographs** | Photographic material (in the quantity indicated above; otherwise the author must indicate the preferred illustrations and graphs in advance) must be delivered in digital format. Photos should be saved in .jpg or .tif format. One file for each photo will be delivered as follows: 'Fig. 1', 'Fig. 2', 'Fig. 3', 'Fig. n'.

**Illustrations, graphs, tables** | Illustrations and graphs (in the quantity indicated above; otherwise the author must indicate the preferred illustrations and graphs in advance) must be delivered in 'vector' form, as high resolution .pdf files (300 dpi), so they are easy to manage. Tables must be delivered in word format and as high resolution .pdf files, so they are easy to manage. One file for each illustration, graph or table will be delivered as follows: 'draw/graph/tab 1', 'draw/graph/tab 2'.

**Image captions** | The image captions (body 9, italics) must be listed at the bottom of the text and numbered as follows: Fig. 1 | ..., Figg. 2, 3 | ..., Figg. 4-6 | .... The numbering must be followed by a hyphen; the source or photographer and year (credit) will be inserted in round brackets. The main text will employ the same wording, but in round brackets: E.g. (Fig. 1), (Figg. 2, 3), (Figg. 4-6), ...

E.g. **Fig. 1** | Giacomo Balla, *Dinamismo di un cane al guinzaglio* (1912).

**Fig. 1** | Le Corbusier, *Unité d'Habitation*, Marseille, 1947-52 (credit: M. Rossi, 2018).

**Figg. 2, 3** | .... or **Figg. 4-7** | ....

**Images, Drawings, Tables, and Graphics Resolution and Mode of delivery** | For the evaluation phase by Referees, images, drawings, tables and graphics must be sent with a resolution of 100 dpi (7.5, 10, 15 or 21 cm base) in the format above specified, at 'segreteria@agathon.it' only using the 'wettransfer.com' platform. For the publication phase, the Author must send the same documentation with a resolution of 300 dpi (7.5, 10, 15 or 21 cm base), through the same platform (wettransfer.com) and at the same address.

## 5. EDITORIAL REFERENCES

For quotations and references to works by other people in your article refer to the Harvard Reference System. The Harvard System excludes bibliographic notes. The Harvard Reference System, also known as the author-date system, is an approved system for citing works. It is distinguished by the fact that in the body of the text the cited work solely consists of a parenthesis with the surname, year and pages, as follows:

E.g. «While information sharing between the private and public sector has improved since 9/11, sharing of information requires additional enhancements» (Dacey, 2002, pp. 23-24).

The directly or indirectly cited works are then listed at the end of the paper in a section entitled 'References'. These bibliographic entries must be complete with all the key elements as shown below. Never use small caps or uppercase for authors' surnames.

Write all the references that you will use in the paper in alphabetical order. Always insert the links from which it is possible to download the cited publication (if open access) or from which the Editorial Board can verify the correctness of the references. Preferably, use the official websites and, if the references have DOIs, the URLs with the DOIs.

Below are some examples of references by type.

**Book:** Surname, initials of the name (year of publication), *Title*, edition, Publisher, Place of publication.

Anderson, C. (2013), *Il ritorno dei produttori – Per una nuova rivoluzione industriale*, Rizzoli Etas, Milano.

## 6. FORMATTING

**Italic characters use** | In the text, characters in italics should not be used except for scientific names in Latin.

**Uppercase character** | In the text and more:

- for books, movies, architectural, art and product-design works, monuments, etc. : es. Il Giorno della Civetta by Leonardo Sciascia is a ... ; the Basilica of St. Peter is the center ...

- for particular words or phrases which should appear in inverted commas, but where, because of the presence of an apostrophe (e.g. authors’ notes), it is preferable to use uppercase character;

- do not use underlining or bold in the text or the notes.

- use uppercase accented letters even if they are not available on your computer keyboard (refer to the instructions for the word processing programme used to find the easiest way to insert them into the text), you should therefore type È and not E’.

**Acronyms and proper names** | When typing the full name of research projects, departments, laboratories and research bodies, the text must be roman type and names must be capitalized.

E.g. **Yes** Laboratorio di Monitoraggio **No** Laboratorio di monitoraggio.

Acronyms must be written in uppercase and explained in round brackets in roman type with initial capital letters.

E.g. APRAE (Analisi Prevenzione e Recupero dell'Abusivismo Edilizio).

Acronyms that are abbreviations of provisions of the law or regulations are written with a full-stop between the letters.

E.g. DPCM for Decreto del Presidente del Consiglio dei Ministri, LR for Legge Regionale.

**Lists** | Any lists in the narration are to be marked with a simple hyphen-space-text or number-round bracket-space-text, and not with bullet points or automatic numbering.

**Use of spaces** | Use a single space after each punctuation mark and no space before, except for dashes and open parentheses; never insert two or more consecutive white spaces; do not leave spaces inside parentheses or quotation marks; do not leave spaces before the punctuation mark.

**Hyphens** | It is preferable to use a long dash with a space both before and after the word or phrase, rather than a shorter one. **Yes** — **No** - E.g. Ei fu — scrisse il Manzoni — sì come ...

**Quotation marks and reported passages** | Words used in an emphatic or figurative sense should go between single quotation marks '...'.  
Quotations and direct speech, as long as they do not exceed two hundred characters with spaces (roughly two lines of text as displayed and printed from your word processing programme), should be in roman type between the open « and closed » quotation marks known as guillemets. Any bibliographical references, according to the Harvard System must be inserted before the final punctuation mark.

E.g. «Il padiglione in un mese è stato realizzato [...] Depero ha già ripetutamente esposto le proprie concezioni [...]» (Rossi, 2018, p. 15).

Quotations within other quotations should have single quotation marks as follows: text «quotation quotation 'quotation within quotation' quotation».

E.g. Il rapporto che sussiste tra la totalità dell'esperienza vissuta e le molteplici immagini di essa fornite «non è certo quello di una descrizione completa, in cui gli oggetti di quelle storie potrebbero essere conosciuti così 'come realmente sono stati'» (Bianchi, 2016, pp. 12-15).

When quoting from poems, verses should be separated with a forward slash /, if they are at least four versus long they should start on a new line with a 1 cm left indent, without quotation marks and with the verses separated by a carriage return.

**Paragraphs** | Paragraphs should not be numbered, but with the title written in bold; subparagraphs are unacceptable.

**Paragraphs with formulae in the text** | Graphic uniformity (font, body, leading); formulae should be dealt with so that they do not alter the paragraph heading, for example by decreasing the font size if possible or using superscript and subscript. Particularly complex formulas (e.g. formulas on two levels) should start on a new line.

## 7. WRITING TIPS

### Structure of an article

The paper will be evaluated according to the evaluation form used by the Referee (downloadable on the Information page 'For Authors and Submission') in relation to:

– **Originality** (intended as the level at which the paper introduces a new way of thinking and/or interpreting the investigated topic, and it stands out and innovates with respect to previous approaches/studies/researches about the same topic providing an advancement of knowledge);

– **Methodological Rigor** (intended as the level at which the paper clearly presents the aims and the state of the art in literature, a methodology appropriate to the typology and object of the essay/research which demonstrates the assumption the contribution is based on, investigates the topic presented with a critical-scientific approach, mature and appropriately referred to the literature of the sector, and places the issues in the current debate);

– **Impact** (intended as the level at which the product exercises, or it is expected to exercise; an influence on the Scientific Community also based on its ability to comply with International quality standards);

– **Clarity of the Contents** (intended as clarity and style of the presentation).

For the drafting of the contribution, the Editorial Board suggests to the Authors to use the suggestions that follow (it is not however necessary that the paper reports as many paragraphs).

The Introduction should be long enough to develop the paper's statement of proposal and frame the topic dealt within the scientific debate, and explain the background of the topic (with an appropriate number of references), but it should not take precedence over the rest of the paper.

The main body of the paper must report clearly: originality, innovativeness, the importance of the topic, and author's contribution to the topic; advancement of knowledge for the disciplinary sector; methodology and phases of the research (in the case of experiments, reporting enough details to allow reproducibility); subjects involved and financing (if any); objectives and results achieved; analytical aspects and proposals for discussion.

The Conclusions summarize: a) the state of the research at the time of writing; b) the limits of research; c) future significant developments; d) the cultural, practical and / or socio-economic implications; e) possibility of bringing the results back to generalizable and applicable guidelines in other contexts.

In general, the following questions must be answered from the reading of the paper:

– Who can be interested in this contribution (essay or research) and why?

- Is the contribution relevant for an international interdisciplinary audience and for the purposes of AGATHÓN?
- Does the paper present a critical understanding of the literature, experiments and theories of the reference disciplinary sector?
- Does the Author explain how he expands this knowledge?
- Are the references updated?
- Are all references relevant and complete?
- Do all the elements of the contribution refer logically to the declaration of intent of the study?
- Is there clarity of objectives, structure and expression?
- Is the narrative argumentation detailed and appropriate?
- Does the title and the abstract accurately describe the contents?
- Are the terms and contexts clearly explained for the international scientific community?

In the specific case of research/experimentation the following questions must be answered from the reading of the paper:

- Are the methodology and work phases clearly illustrated and make the study easily reproducible?
- Are they appropriate to the objectives and aims of the research?
- Are the tests or results reliable?
- Are the results communicated clearly and concisely?
- Is the analysis and interpretation of the results appropriate?
- Are the conclusions sufficiently based on the experimentation performed?
- Logically follow the data presented?
- Are the limits of research recognized and discussed?
- Do the conclusions demonstrate a real understanding of the subject?
- Are the cultural, practical and/or socio-economic implications presented?
- Are they consistent with the tests performed, the results obtained and the topics covered?
- Are future significant developments presented?

For the Research and Experimentation articles, the Editorial Board recommend the following publication as a reference:

Socolofsky, S. A. (2004), *How to write a Research Journal Article in Engineering and Science*. [Online] Available at: [https://ceprofs.civil.tamu.edu/ssocolofsky/downloads/paper\\_how-to.pdf](https://ceprofs.civil.tamu.edu/ssocolofsky/downloads/paper_how-to.pdf) [Accessed 7 January 2018].

For the structure of a Review Article refer to the following text:

Palmatier, R. W., Houston, M. B. and Hulland, J. (2017), "Review articles: purpose, process, and structure", in *Journal of the Academy of Marketing Science*, January 2018, vol. 46, issue 1, pp. 1–5. [Online] Available at: <https://doi.org/10.1007/s11747-017-0563-4> [Accessed 7 January 2018].

## 8. GENERAL ADVICES

- Units of measurement of weight and length (gm, cm, m, etc.) are placed after the number and are always in the singular.

E.g. **Yes** m 4, **No** 4 metres, **No** m. 4; **Yes** 3 gm, **No** gm 3.

- Centuries are cycles of time and are written as follows:

E.g. **Yes** 16th century, **Yes** 1500s, **No** XVII century.

- Decades are written as follows:

E.g. **Yes** The 1920s; **No** The twenties.
