AGATHÓN is an International Journal of Architecture, Art and Design – Open Access – included in the 2019 ANVUR list, area 08 and 10, of Scientific Journals. The International Scientific Committee, for its issue n. 6|2019, which will be published in December, promotes the topic Resilience between Mitigation and Adaptation.

The climatic, environmental and anthropic changes that characterize the beginning of this millennium increasingly are a major subject in the international debate since they influence, on the one hand, the protection of territories, landscapes and fragile urban areas, and on the other, the uses, performance and efficiency of architectural artefacts and everyday objects. Moreover, the shortage of natural resources, the global economic crisis, the mass migratory flows and the unpredictability of seismic events, are a source of continuous instability which can be dealt only with “resilient thoughts” capable of answering continuous or sudden changes.

In general, Resilience is considered as the property of complex systems to respond to stress events, activating response and adaptation strategies in order to restore functioning mechanisms: resilient systems, facing stressful events, react by renewing themselves but maintaining the functionality and the recognizability of their systems» (Gunderson and Holling, 2002). Within a positive dynamic process, aimed at managing events and rebuilding a new (landscape, urban, architectural, economic, social, etc.) balance, resilience does not imply the restoration of an initial state, but the acquisition of a new balance and maintenance of functionality through two approach strategies. The first strategy is “Adaptive”, focused on the dynamic nature of operational methods – from ideational, compositional/design, to productive, realization, operational and management methods – in which all the elements of the built environment, from the territorial and urban scale, building, to the material and object scale, effectively adapt to new balances with higher performance levels. The second strategy is “Mitigative”, where research is directed to innovative technologies (process, project and product) aimed at risk prevention and minimizing any impact – concerning unsettling events due to environmental, seismic, anthropic and social change – and aiming at the realization of urban systems, buildings, objects, components and sensitive materials, with variable behaviour and in an energetic-dynamic equilibrium with climatic and environmental changes.

In this regard, AGATHÓN aims to deal with the theme of Resilience between Mitigation and Adaptation with the aim of collecting essays and critical reflections, researches and experiments, projects and interventions referred, on interscale terms, to the different dimensions of the man-made and natural environment, to which risk, fragility and vulnerability can no longer be dealt with individually by the traditional tools of sustainability, innovation, redevelopment or regeneration, but only through a systemic approach capable of supporting, integrating and fostering relationships between individual, group and community, cultural and multi/transdisciplinary competences (urban planning, architecture, representation, history, restoration recovery, technology, design and communication, economy, sociology, psychology, etc.) thus integrating humanistic and technical knowledge. More specifically, the main areas of interest concern:

- **Landscape and Territory Scale**: as cross-disciplinary synthesis of systemic and integrated knowledge of the environment, in its natural aspects (natural and naturalized signs, natural network systems, etc.) and related to anthropic uses and transformations (networks and infrastructures, etc.); a resilient landscape policy must take into account, above all, the non-material interests and desires of the population, beauty, biological and landscape diversity, habitats, identification with the territory, etc.;
- **Urban Scale**: the quality of cities requires complex strategies, both for intervention scales (structural and process interventions) and for fields of action (economic, environmental, social), to be continuously implemented over time and with respect of the characteristics of the contexts; the resilient city changes by designing innovative social, economic and environmental responses that allow cities to withstand the demands of the environment and history in the long run;
- **Architecture and Building Scale**: to ensure a resilient approach, Architecture must absorb, on the one hand, the principle of adaptation (to contexts, climate, and risks), on the other the principle of degrowth and of limit, intended as saving/optimization of natural resources and minimum pollution in all stages of their life cycle; case studies and experimental creations represent their privileged interpretation;
- **Material Scale**: the levels of innovation in building creation and the technological abilities to manage the transformation processes have changed the base scenario, entrusting the handling of the building process to the integration of the building construction project with the components and materials. By thematically contextualizing the definition of material compatibility, the interpretive keys include – but are not limited to – innovation, efficiency, quality, technique and vulnerability.
Authors are invited to send an abstract (max 5,000 characters, spaces included; references are not included in the counting) in Italian, or in English in the case of a foreign contributor, which must mirror the main contents of the article.

The abstract must be written in a concise and clear manner, corresponding clearly to the themes of the Call for Papers. The abstract must be accompanied by: Author’s references (name, surname, qualifications, affiliation, telephone numbers, e-mail); the section in the Journal (Architecture, Art, Design) in which publication is being sought and the typology of article (Essays & Viewpoint, Research & Experimentation, Reviews Article, Dialogue) that is submitted for publication; 5 keywords that reflect the contents of the paper; references cited.

In particular, the Research & Experimentation proposals have to outline:

- originality (what is being expressed for the first time and for whom);
- essay and research references (the background of the study), relevance to theme, subjects involved, financing;
- results (analytical aspects and proposals for discussion);
- limitations of research and significant developments;
- cultural, practical and/or socio-economic implications, wherever present.

In the case of Essays & Viewpoint proposals, attention has to be given to:

- object and aim of the proposed article;
- originality: what is being expressed for the first time and for whom;
- methodological approach;
- essay and research references that reveal the background of the study;
- analytical aspects and proposals for discussion.

The abstract submission is possible by the deadline of September 3rd, 2019, by sending a .doc file to the email address redazione@agathon.it. The Authors of accepted abstracts will receive a communication from the Secretary by September 10th, 2019. Once an abstract has been accepted, the Authors will be invited to deliver the paper within the terms set, i.e. by October 17th, 2019. The paper must respect the number of 25,000 or 30,000 characters, including spaces, notes and references. 15 images (300 dpi) must also be sent via “wetransfer.com”.

The Authors of the accepted papers, having been reviewed by Referees, will know the outcome by November 3rd, 2019; the final draft of the paper, with any parts integrated following recommendations by the Referees, must be presented by November 13th, 2019.

Paper, abstract and keywords must be entirely written both in Italian and in English language while notes, captions of images, texts of any tables and Author’s biography will be published only in English language. The text, references, images and notes, must respect the Editorial Guidelines for Authors, as laid down in the Journal’s web-site: www.agathon.it. On the same website, Authors can find the new template (in Word format file) with which to submit the abstract and the paper both in Italian and English language, the review procedure and the review form of the articles edited by Reviewers.

POLICY FULL OPEN ACCESS – AGATHÓN is a Full Open Access Journal, in the sense that it guarantees that no user, no university library nor individual reader, will have to pay a pay-per-view fee in order to have access to the published contents. Consequently, AGATHÓN gains no income nor profit from the sale of printed issues or the on-line version from pay-per-view fees.

In order to cover the costs of running the Journal and dealing with procedures for assessing manuscripts using a double blind peer-review, AGATHÓN has decided to avail itself of a contribution from the Authors of the individual articles; they are therefore invited to contribute financially towards the editorial services (APC - Article Processing Charge), only if the paper is accepted for publication, after the peer-review process and any potential revision of the manuscript. The contribution for authors of a single paper is set at: € 100 for DEMETRA Ce.Ri.Med. members; € 150 for not DEMETRA Ce.Ri.Med. members.

In the case of papers written by more Authors, the article publication fee will be increased by € 50 for each corresponding Author in addition to the first one. The fee must be paid in accordance with the directions that will be sent to Authors at the same time as the communication of acceptance of the paper for publication. The fee must be paid via bank transfer:

DEMETRA Ce.Ri.Med.
Banca UNICREDIT, Viale della Libertà D - Palermo
IBAN: IT 06 T 02008 04638 000104623621
Swift/BIC: UNCRIPTM1856

To encourage the publication of contributions by Authors with primary affiliation to Universities and Research Institutions in countries defined by the World Bank as “low-income and lower-middle-income economies”, AGATHÓN will select a maximum of two Authors to publish their contribution for free, subject to the positive outcome of the double-blind peer review process.
1. AIMS AND PAPER CATEGORIES
AGATHÓN is a Scientific Journal targeted at an international and interdisciplinary community. It reports essays and viewpoint, reviews, interviews and recent results of research and innovative-current applications, in particular presenting evidence of how research results can be applied. AGATHÓN publishes full articles and papers by Authors working in Universities and research Institutes. The articles selected for publication, after the double-blind peer review process, will be inserted in one of the sections “Architecture” (architectural, urban and interior design, exhibition and museum design, technology, history, recovery and restoration), “Art” (modern and contemporary) or “Design” (for industry, crafts and communication) and will be classified into the following categories: “Essays & Viewpoint”, “Research & Experimentation”, “Reviews Article” or “Dialogue”. The essays on “Focus” section are signed by Authors invited by the Scientific Director as experts on the subject and are not subject to the double-blind peer review process.

2. PAPER SUBMISSION
Papers must be sent by email to the following address: redazione@agathon.it together with everything indicated in point 3. Images must be saved as separate files, as stated in point 4. The layout is reviewed by the Editorial Board during editorial meetings; except when expressly requested, Authors will be sent the relative draft layouts for review. Papers that do not comply with the editorial rules set out below will not be accepted. All communication (acceptance or rejection of the article, other types of communication) will be made solely to the contact Author, identified by default as the person who sent the article. Articles submitted for a double blind peer review, if accepted for publication, may be sent back to the contact Author for any additions/corrections required. The final decision regarding acceptance, revision or rejection rests with the Scientific Director.

3. PAPER FORMAT
Size of articles | The size for articles is 25,000 (equal to 8 Journal pages) or 30,000 (equal to 10 Journal pages) characters (including spaces, notes and references) in Italian or in English language. Abstract and Authors’ CV are not included in the count.

Texts | The texts, all in Italian and English language, must be delivered in digital format using only .docx format that can be downloaded in the journal’s site. Two files will be delivered: one for the Italian text and one for the English text, complete with the name of the author and the title of the paper as follows: M_Rossi_title IT and M_Rossi_title ENG. Authors are expressly invited to have their texts in English/Italian scrutinized and corrected by a native English/Italian speaker. Articles that are written in faulty English/Italian will not be accepted.

Times New Roman corpo 11 characters should be used in articles.
The text must include:
• Title (max. 85 characters with spaces), uppercase and bold characters, in IT and ENG.
• Authors: name, surname.
• Category of article.
• Article abstract (max. 800 characters with spaces), italic corpo 9 characters, in IT and ENG.
• Keywords (5 keywords), in IT and ENG.
• Body of the article, in IT and ENG.
• Numbered footnotes at the end of the paper (corpo 9 characters), in IT and ENG.
• Image captions (corpo 9 characters) supplied with the article; image captions must contain the same letters/numbering used for the corresponding files, name of the photographer(s) or copyright, in IT and ENG.
• Technical details of any projects listed in the article, or Location, Client, Designers, Chronology, (Manufacturers and Businesses, if of interest), in IT and ENG.
4. IMAGES / FIGURES

Number of accompanying graphics | The quantity of graphic additions (photographs, illustrations, graphs, tables) for each article must be decided by the author bearing in mind the size of the text and number of pages normally envisaged for the type of article. The graphic additions should complement understanding of the text; a space for the graphic extras, occupying no more than 40% of the space allotted for the article, is hypothesized; the number of images is estimated as between 10 and 20. It is preferable to send an accompanying image that can be read in both b/w and colour.

Photographs | Photographic material (in the quantity indicated above; otherwise the author must indicate the preferred illustrations and graphs in advance) must be delivered in digital format. Photos should be saved in .jpg or .tif format. One file for each photo will be delivered as follows: ‘Fig. 1’, ‘Fig. 2’, ‘Fig. n’.

Illustrations, graphs, tables | Illustrations and graphs (in the quantity indicated above; otherwise the author must indicate the preferred illustrations and graphs in advance) must be delivered in ‘vector’ form, as high resolution .pdf files (300 dpi), so they are easy to manage. Tables must be delivered in word format and as high resolution .pdf files, so they are easy to manage. One file for each illustration, graph or table will be delivered as follows: ‘draw/graph/tab 1’, ‘draw/graph/tab 2’.

Image captions | The image captions (body 9, italics) must be listed at the bottom of the text and numbered as follows: Fig. 1 - ...., Figg. 2, 3 - ...., Figg. 4-6 - .... The numbering must be followed by a hyphen; only the title of the work must be in ‘light’ while the source or photographer and year (credit) will be inserted in round brackets. The main text will employ the same wording, but in round brackets: E.g. (Fig. 1), (Figg. 2, 3), (Figg. 4-6), ...

E.g. Fig. 1 - Giacomo Balla, Dinamismo di un cane al guinzaglio (1912).
     Fig. 1 - Le Corbusier, Unité d’Habitation, Marseille, 1947-52 (credit: M. Rossi, 2018).
     Figg. 2, 3 - .... or Figg. 4-7 - ....

Images, Drawings, Tables, and Graphics Resolution and Mode of delivery | For the evaluation phase by Referees, images, drawings, tables and graphics must be sent with a resolution of 100 dpi (7.5, 10, 15 or 21 cm base) in the format above specified, at segreteria@aghanon.it only using the wetransfer.com platform. For the publication phase, the Author must send the same documentation with a resolution of 300 dpi (7.5, 10, 15 or 21 cm base), through the same platform (wetransfer.com) and at the same address.

5. EDITORIAL REFERENCES

For quotations and references to works by other people in your article refer to the Harvard Reference System. The Harvard System excludes bibliographic notes. The Harvard Reference System, also known as the author-date system, is an approved system for citing works. It is distinguished by the fact that in the body of the text the cited work solely consists of a parenthesis with the surname, year and pages, as follows:

E.g. «While information sharing between the private and public sector has improved since 9/11, sharing of information requires additional enhancements» (Dacey, 2002, pp. 23-24).

The directly or indirectly cited works are then listed at the end of the paper in a section entitled “References”. These bibliographic entries must be complete with all the key elements as shown below. Never use small caps or uppercase for authors’ surnames. When typing bibliographic entries, follow the instructions set out in the table below:

- Book: Surname, initials of the name (year of publication), Title, edition, Publisher, Place of publication.

- Book chapter: Surname, Initials of the name (year of publication), “Chapter title”, in Surname of the editor, initials of the name (ed.), Book title, edition, Publisher, Place of publication, chapter page numbers.

- Journal articles: Surname, Initials of the name (year of publication), “Title of the article”, Journal
title, volume number, issue number (if existing), article page numbers.

- Electronic resources: this entry concerns sources that are only available electronically and not those that can be accessed electronically but are also available in paper format. They follow the same conventions as paper sources, but they also include details typical of the Web: Name (year of publication), Article title. [Online] Available at: complete url [Accessed 10 June 2017].

- Conference proceedings: papers not published in the Journal, but as convention or conference proceedings. They might follow one of the styles below:

- Report: Name of the organization (year of publication), Title of the report, Publisher and place of publication.

6. FORMATTING

Italic characters use | In the text, characters in italics should not be used except for scientific names in Latin.

Uppercase character | In the text and more:
- for books, movies, architectural, art and product-design works, monuments, etc.: es. Il Giorno della Civetta by Leonardo Sciascia is a ... ; the Basilica of St. Peter is the center ...
- for particular words or phrases which should appear in inverted commas, but where, because of the presence of an apostrophe (e.g. authors’ notes), it is preferable to use uppercase character;
  • do not use underlining or bold in the text or the notes.
  • use uppercase accented letters even if they are not available on your computer keyboard (refer to the instructions for the word processing programme used to find the easiest way to insert them into the text), you should therefore type È and not E’.

Acronyms and proper names | When typing the full name of research projects, departments, laboratories and research bodies, the text must be roman type and names must be capitalized.

E.g. Yes Laboratorio di Monitoraggio No Laboratorio di monitoraggio.

Acronyms must be written in uppercase and explained in round brackets in roman type with initial capital letters.

E.g. APRAE (Analisi Prevenzione e Recupero dell’Abusivismo Edilizio).

Acronyms that are abbreviations of provisions of the law or regulations are written with a full-stop between the letters.

E.g. D.P.C.M. for Decreto del Presidente del Consiglio dei Ministri, L.R. for Legge Regionale.

Lists | Any lists in the narration are to be marked with a simple hyphen-space-text or number-round bracket-space-text, and not with bullet points or automatic numbering.

Use of spaces | Use a single space after each punctuation mark and no space before, except for dashes and open parentheses; never insert two or more consecutive white spaces; do not leave spaces inside parentheses or quotation marks; do not leave spaces before the punctuation mark.

Hyphens | It is preferable to use a long dash with a space both before and after the word or phrase, rather than a shorter one. YES — NO — E.g. El fu — scrisse il Manzoni — si come ...

Quotation marks and reported passages | Words used in an emphatic or figurative sense should go between single quotation marks ‘…’.

Quotations and direct speech, as long as they do not exceed two hundred characters with spaces (roughly two lines of text as displayed and printed from your word processing programme), should be in roman type between the open « and closed » quotation marks known as guillemets. Any bibliographical references, according to the Harvard System must be inserted before the final punctuation mark.

Es.: «Il padiglione in un mese è stato realizzato [...] Depero ha già ripetutamente esposto le proprie concezioni [...]» (Rossi, 2018, p. 15).

Quotations within other quotations should have single quotation marks as follows: text «quotation quotation ‘quotation within quotation’ quotation».

Es.: Il rapporto che sussiste tra la totalità dell’esperienza vissuta e le molteplici immagini di essa fornite «non è certo quello di una descrizione completa, in cui gli oggetti di quelle storie potrebbero essere conosciuti così ‘come realmente sono stati’» (Bianchi, 2016, pp. 12-15).
When quoting from poems, verses should be separated with a forward slash /, if they are at least four versus long they should start on a new line with a 1 cm left indent, without quotation marks and with the verses separated by a carriage return.

**Paragraphs** | Paragraphs should not be numbered, but with the title written in italics; subparagraphs are unacceptable.

**Paragraphs with formulae in the text** | Graphic uniformity (font, body, leading); formulae should be dealt with so that they do not alter the paragraph heading, for example by decreasing the font size if possible or using superscript and subscript. Particularly complex formulas (e.g. formulas on two levels) should start on a new line.

### 7. WRITING TIPS

#### Structure of a Research Article

The *Introduction* should be long enough to develop the paper's statement of proposal and explain the background of the topic (with an appropriate number of references), but it should not take precedence over the rest of the paper.

The *main body of the paper* must report clearly:

- originality, innovativeness and importance of the topic;
- advancement of knowledge for the sector;
- methodology and phases of the research (in the case of experiments, reporting enough details to allow reproducibility);
- subjects involved and financing (if any);
- objectives and results achieved;
- analytical aspects and proposals for discussion.

The *Conclusions* review progress on:

- de facto state of research at the time of writing;
- limitations of research;
- significant developments;
- cultural, practical and/or socio-economic implications, wherever present.

As a reference, the Authors can read the following publication:

#### Structure of a Review Article

To write a Review Article see:

### 8. GENERAL ADVICES

Bearing in mind each author’s individual style, it should be noted that, in order to render the text easier to translate into English, it is advisable to employ the typical Julius Caesar writing style (De Bello Gallico) rather than that of Cicero (Orationes).

A paragraph of six lines should be divided up into three sentences.

E.g. - main sentence of two lines followed by a semi-colon;
- second sentence after the semi-colon, clarifying the concept of the first sentence and closing with a full-stop;
- third sentence, integrating the first two sentences and ending with a full-stop.

**A few points:**

- units of measurement of weight and length (gm, cm, m, etc.) are placed after the number and are always in the singular.
  
  E.g. **Yes** m 4, **No** 4 metres, **No** m. 4; **Yes** 3 gm, **No** gm 3.
- centuries are cycles of time and are written as follows.
  
  E.g. **Yes** 16th century, **Yes** 1500s, **No** XVII century.
- decades are written as follows
  
  E.g. **Yes** The 1920s; **Yes** The twenties, **No** The twenties.
